Comment from me.

I believe that many companies do not quite understand many things at this time.

We need to reorganize their actions. And analyze what you create.
One second and you have cancellation cult.

Quick understanding and response will help you make the product that will be used by many.

The main thing is convenience for everyone.

- UI / UX Design
- HTML
- CSS
- JavaScript
- Python
- C++
- Java

The line of my learning and work is up to creating projects. You can also see the dates and location of training.
